PROJECT:

E-commerce Website Deployment on AWS

Project Goal:

Developed and deployed a fully functional E-commerce website as a final year project, utilizing various AWS services to ensure scalability, security, and reliability.

- Leveraged EC2 instances for hosting the web application, implementing load balancing to distribute traffic and enhance performance.
- Utilized Amazon RDS to manage the MySQL database, optimizing data storage and retrieval for seamless user experience.
- Implemented IAM roles and permissions to restrict access and ensure data privacy in compliance with industry standards.
- Integrated Amazon S3 for storing static assets and media files, resulting in faster page load times and efficient content management.
- Configured CloudWatch alarms to monitor system health, proactively addressing any potential issues and maintaining high availability.
- Implemented CI/CD pipeline using AWS CodePipeline to automate deployment processes, streamlining updates and reducing downtime.
- Successfully presented the project, highlighting its AWS infrastructure, to the university panel and achieving top marks.
